Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 November 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Response to Arguments

1. In view of the Appeal Brief filed on November 3, 2003, PROSECUTION IS HEREBY REOPENED. New grounds of rejection are set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-15 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,532,217 to Alkhatib et al.

Regarding claims 1-3, 8 and 11-13, Alkhatib teaches a method comprising a router: identifying active communication links to provide identified active communication links (e.g., see col. 5, lines 15-49 and FIG. 2 regarding devices 72, 74 and 76 and communication links to subnet 70); and automatically identifying whether the router needs a new address prefix for the identified active communication link (e.g., see col. 3, lines 27-41 wherein finding a conflict identifies a new address prefix is required).

Further, regarding claim 8, Alkhatib teaches automatically identifying whether the router needs to support the identified active communication link (e.g., see col. 4, lines 35-53 wherein the routing table determines whether the router is to support the link, or if packets should be forwarded to another router).

Regarding claims 4 and 14, Alkhatib teaches automatically determining whether the router needs to advertise a new address prefix for use by link endpoints (e.g., step 94 in FIG. 3A; see also col. 5, line 50 – col. 12, line 63, and specifically col. 10, lines 23-32).

Regarding claims 5, 6, 9 and 10, Alkhatib teaches automatically monitoring the identified active communication link for prefix advertisements from another router and determining when the router has not received a prefix advertisement from another router for the same active communication link within a predetermined period of time, wherein the router then needs to support the identified active communication link (e.g., see col. 9, line 39 – col. 11, line 45).

Regarding claims 7 and 15, Alkhatib teaches automatically determining whether the router needs to advertise an address prefix for use by link endpoints by soliciting at least one router to advertise (e.g., see col. 5, lines 50-59).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent No. 6,178,466 to Schutte et al. discloses a router which dynamically requests network addresses, and U.S. Patent No. 6,618,760 to Aramaki et al. discloses a forwarding information retrieval technique.
